# GETTING STARTED

## THE NINTENDO GAMECUBE™ CONSOLE

Before turning the power ON, make sure you have inserted the Nintendo GameCube™ Game Disc, Controllers and other peripherals (if you are using any).

### WARNING

Never try to insert or remove a Game Disc when the power is on!

## THE NINTENDO GAMECUBE™ MEMORY CARD

Defender® lets you save accumulated data to a Memory Card inserted in Slot A. This will come in handy when you want to save your game data and play it in a friend's Nintendo GameCube™.

Each time you start Defender on your Nintendo GameCube™, the game will read any inserted Memory Card (in Slot A) then load your saved settings and other saved data. This saves you from having to go through the menus to adjust the settings to your liking each time you want to play the game.

**NOTE:** Please refer to the Nintendo GameCube™ instruction booklet (pages 18-20) for directions on how to format and erase Memory Card files.

## QUITTING A GAME IN PROGRESS

To quit a game in progress, press START/PAUSE during the game. The Pause Options screen will appear. Select QUIT and press the A Button. Next select YES and press the A Button once again and you'll be brought to the Mission Failed screen.

Once you have made your purchases or if you choose not to upgrade at this time, press **↑** or **↓** on the Control Stick to highlight CONTINUE and press the A Button to begin your campaign.

## DURING THE GAME

Each Defender ship is essentially controlled by its pitch and its roll. The pitch determines the change in elevation, the roll determines how fast the craft steers into a turn.

Thrusters cause your ship to accelerate forward or in reverse. If you don't apply your thrusters your ship gradually slows down to its minimum flying speed.

There is a maximum elevation that a Defender ship can reach. At this elevation you may still point your nose above the horizon line, but you cannot increase your elevation.

Turn ship using Control Stick.

Pick up colonists on the ground.

Because the Defender ship must often dive toward the ground to pick up or put down objects, it's designed to survive scrapes with the ground. The craft automatically levels out and drags along the ground (slowing down and kicking up dust). Running into the ground doesn't damage the ship, it only slows it down.

## PLAYING THE GAME

The Defender can pick things up by flying into them either on the ground or in the air. Things that should be picked up, like colonists, tanks and so forth automatically hook on to the ship. Colonists automatically detach from your ship only if you fly into a landing pad on the ground. Other items, like tanks, unhook from your ship on their own when you fly into the ground.

*Drop off colonists on flashing target.*

*Dodge enemies quickly using the C Stick.*

Use the C Stick to perform advanced flying maneuvers. You'll be able to perform Barrel Rolls, 180° and 360° turns. These are helpful by allowing you to quickly change directions in order to make a quick pick-up or help you avoid enemy fire.

### BONUS TIPS:

- Remember to take colonists back to the drop zone if you need power ups.
- Use your map. Hit the Z Button button while in a mission to bring up a tactical map of the level that will show you the location of colonists and enemy units.
- Remember that you have a special weapon on board. It's limited, so use it wisely.

## PLAYING THE GAME

### HEADS UP DISPLAY (HUD)

The HUD contains all the on screen information you'll need during a game. The information below features callouts of what you'll see on the screen.

#### SINGLE PLAYER HUD

#### 1 - WEAPON DISPLAY

A silhouetted icon of the currently selected weapon.

#### 2 - HEALTH DISPLAY

It starts out healthy as green, as your ship becomes damaged it turns to yellow and turns red when very damaged.

#### 3 - SCANNER

This shows position of landers, colonists, and various alien craft relative to your current position.

#### 4 - AMMUNITION DISPLAY

Shows the amount of charge or ammunition available in the currently selected weapon.

## 2 PLAYER

The 2 PLAYER menu contains two game modes. From the Main menu, highlight 2 PLAYER and press the A Button to access the 2 PLAYER menu.

**NOTE:** You must have two Controllers inserted into CONTROLLER PORTS A and B in order to access the 2 PLAYER menu.

Once you have accessed the 2 PLAYER menu, select between Deathmatch and Cooperative mode. Once a mission is agreed upon and selected from the Mission Select screen you'll be brought to the Spaceship Select menu where each player will be able to choose their own ship.

### 2 PLAYER HUD

Player 1 will appear on the top half of the screen while Player 2 will appear on the bottom half. All HUD displays are the same as pointed out on the previous page.

### DEATHMATCH

In Deathmatch mode you and a friend will battle against each other. It's a one on one dogfight to win the game by destroying your opponent before he destroys you!

### COOPERATIVE

In Cooperative mode, you and a friend work together to rescue colonists as well as destroy enemy forces.

## DEFENDER UNIVERSE

### FROM THE BEGINNING

When the First Swarm came to Earth, we didn't know what hit us. The skies went dark as they filled with Manti bugs. Manti consume human DNA to survive and power their fleet. Soon whole cities were consumed and harvested by the ravenous swarm. Once harvested, infected humans become dangerous mutants turning on their own by attacking humans in battle. Fleeing to the Solar Colonies, our species grew scattered and weak. By the time the Second Swarm arrived, the Earth was barely fit for human life. Now the Second Swarm is well underway. The Manti have taken the Earth as their own homeworld. If there is a Third Swarm, human life will not survive it. The Manti threat must soon be eliminated if the human species is to continue to survive.

Human resistance is led by a coalition of galactic troops known as the GSA (Galactic Stargate Authority). Headquartered at Cydonia Base, Mars, GSA troops cross the galaxy using a network of stargates to attack bug outposts. Only bold GSA Defenders, the elite pilots of the Galactic Stargate Authority, stand in the way of human extinction. No treaties can be made, no peace can be reached.

Manti have hijacked Earth as their new homeworld. It's not looking good for mankind. This is where you come in. You've enlisted in the Swarm Wars and you're going to drive the deadly Manti out of the solar system once and for all.

### COLONISTS

#### SAVED COLONISTS

Saving colonists during a mission earns you credits to buy cool new weapons. You can drop colonists off at a drop zone to get power ups. Power ups will restore your health and reload your weapon rack. If you drop the colonists off at a missile crawler or tank factory, you can build your own army for ground and air defense. For every three colonists you drop off at a tank factory, you can build one tank. For every two you drop off at a missile crawler factory, you can build one missile crawler.

#### ABDUCTED COLONISTS

In Defender, colonists are the resource for both the human resistance and the Manti. Colonists that you save in missions help research new technology, build new ships and provide reinforcements. Colonists captured by aliens are mutated into new Manti Craft or allow Manti Craft to mutate into more dangerous forms.

As in the original, if a lander captures a colonist and holds him in orbit for an appropriately long period of time that lander becomes a mutant. While landers are pretty wimpy, mutants are tough opponents.
